Subject index of volume 332

acetylcholine, opioid receptors; hippocampus, rabbit, 156
AD6, platelet aggregation, beta-thromboglobine, thromboxane; human platelets, 305
adenosine receptors, cAMP, adenylate cyclase, enprofylline; hyppocampus, rats, 173
adenosine receptors, cyclopentyladenosine, radioligand binding; brain, rats, 179
adenylate cyclase, beta-adrenoceptors; turkey erythrocyte ghosts, 247
adenylate cyclase, enprofylline, adenosine receptors, cAMP; hyppocampus, rats, 173
adrenoceptors, 113
alpha 2-adrenoceptors, idazoxan; tail arteries, rats, 43
alpha 2-adrenoceptors, serotonin autoreceptors; brain cortex, rabbit, 324
alpha-adrenoceptors, clorgyline, norepinephrine; vasculature, rats, 236
alpha-autoadrenoceptors, guanabenz, clonidine; blood pressure, rats, 332
analgesia, serotonin, morphine; analgesia measurements, rats, 208
angiotensin-2, antidiuresis, beta-adrenoceptors, saralasin; renal function, rats, 271
angiotensin-2, vasoconstriction, eicosapentaenoic acid, noradrenaline; ear, rabbit, 288
antiarrhythmic drugs, sodium channel blockade, tetrodotoxin, inotropic effect; papillary muscle, guinea-pig, 184
anticholinergic effect, antischizophrenic effect, antidepressant effect, fluperlapine; rodent, bovine and crustacean preparations, 357
anticonvulsant action, memantine; convulsions, mice, 93
antidepressant effect, fluperlapine, anticholinergic effect, antischizophrenic effect; rodent, bovine and crustacean preparations, 357
antidiuresis, beta-adrenoceptors, saralasin, angiotensin-2; renal function, rats, 271
antiepileptics; hippocampus, rats, 89
anti-inflammatory effect, leucocytes, counter irridation; oedema, rats, 196
antischizophrenic effect, antidepressant effect, fluperlapine, anticholinergic effect; rodent, bovine and crustacean preparations, 357
apamin, enteric neurons, neurotransmitters, ATP; gastrointestinal tract, guinea-pig, 79
arachidonic acid, linoleic acid, sodium pump, ATPase; human colonic homogenates, 332
ATP, apamin, enteric neurons, neurotransmitters; gastrointestinal tract, guinea-pig, 79
ATPase, arachidonic acid, linoleic acid, sodium pump; human colonic homogenates, 332
ATPase, sodium, sympathomimetic amines; vas deferens, rats, 135

benzazepines, neuroleptics, dopamine receptor antagonists, cortisol, SCH 23390; dog, 111
beta-adrenoceptor antagonists, CGP 20712 A, chronotropic effect; heart, rats, 406
beta-adrenoceptor blockers, structure-activity relation; heart, guinea-pig, 297
beta-adrenoceptors, adenylate cyclase; turkey erythrocyte ghosts, 247
beta-adrenoceptors, betaxolol, noradrenaline; atrial slices, rats, 253
beta-adrenoceptors, inotropic effect, ICI 118,551, bisoprolol, procaterol; human right atrium, 142
beta-adrenoceptors, saralasin, angiotensin-2, antidiuresis; renal function, rats, 271
beta-thromboglobine, thromboxane, AD6, platelet aggregation; human platelets, 305
betaxolol, noradrenaline, beta-adrenoceptors; atrial slices, rats, 253
binding studies, receptor heterogeneity, receptor subpopulation, 313
biogenic amines, transmitter systems, psychoactive drugs; brain, rats, 258
bisoprolol, procaterol, beta-adrenoceptors, inotropic effect, ICI 118,551; human right atrium, 142
blood pressure, methylene ATP, noradrenaline; tail artery, rats, 384
blood pressure, opioid peptides, opioid receptors, noradrenaline; pithed rabbit, 50
blood pressure, transmitter release, sodium; hypertensive rats, 364

calcium channel blockers, prostacyclin, trauma; aorta, rats, 70
calcium, neurotensin, dopamine, flunarizine; striatum, rats, 267
calmodulin antagonists, sodium nitroprusside, relaxation; smooth muscle, rabbit, guinea-pig, 391
cAMP, adenylate cyclase, enprofylline, adenosine receptors; hyppocampus, rats, 173
capsaicin, gastrointestinal propulsion, gastric emptying, defaecation; rats, 62
capsaicin, micturition reflex; urinary bladder, rats, 276
carbachol, temperature dependency, subsensitivity, contractile response; trachea, guinea-pig, 219
cardiac glycosides, gomphoside, structure-activity relationship; heart, guinea-pig, 98
cardiovascular nerves, noradrenaline, neuropeptide Y, reserpine; heart, guinea-pig, 163
carrier-mediated transport, sodium, noradrenaline; vas deferens, rats, 131
catecholamine inactivation, 201
catecholamines, neuronal-extraneuronal deamination, isotope effects; rats, rabbits, 34
catecholamines, potassium, GABA; adrenal glands, dog, 66
catecholamines, sodium pump; bovine adrenal medulla, 351
CGP 20712 A, chronotropic effect, beta-adrenoceptor antagonists; heart, rats, 406
choline, phospholipids, phospholipase D, muscarine receptor; heart, chicken, 224
chronotropic effect, beta-adrenoceptor antagonists, CGP 20712 A; heart, rats, 406
clonidine, alpha-autoadrenoceptors, guanabenz; blood pressure, rats, 332
clorgyline, norepinephrine, alpha-adrenoceptors; vasculature, rats, 236
contractile response, carbachol, temperature dependency, subsensitivity; trachea, guinea-pig, 219
cortisol, SCH 23390, benzazepines, neuroleptics, dopamine receptor antagonists; dog, 111
counter irridation, anti-inflammatory effect, leucocytes; oedema, rats, 196
cryopreservation, dimethyl sulfoxide; vessels, dog, 74
cyclopentyladenosine, radioligand binding, adenosine receptors; brain, rats, 179
cytolysis, pseudomonas aeruginosa cytotoxin, plasma membrane binding; Ehrlich ascites cells, 103

defaecation, capsaicin, gastrointestinal propulsion, gastric emptying, rats, 62
3,4-dihydroxyphenylethyleneglycol, noradrenaline; brain, rats, 26
dimethyl sulfoxide, cryopreservation; vessels, dog, 74
DMAE, neuromuscular junction, hemicholinium-3 analog; pectoralis muscle, frog, 230
domperidone, dopamine receptors; striatum, olfactory tubercle, rats, 21
dopamine agonists, stereotypy, receptor binding method; rats, 338
dopamine, feedback inhibition, tyrosine hydroxylase; pheochromocytoma cells, rats, 346
dopamine, flunarizine, calcium, neurotensin; striatum, rats, 267
dopamine receptor antagonists, cortisol, SCH 23390, benzazepines, neuroleptics; dog, 111
dopamine receptors, domperidone; striatum, olfactory tubercle, rats, 21

dopamine receptors, vasopressin, fenoldopam; neurohypophysis, rats, 332
L-threo-DOPS, noradrenergic neurons, imipramine; reserpine-induced ptosis, mice, 243

eicosapentaenoic acid, noradrenaline, angiotensin-2, vasoconstriction; ear, rabbit, 288
enkephalinase inhibition, MAO-B-nociception; rats, 376
enprofylline, adenosine receptors, cAMP, adenylate cyclase; hyppocampus, rats, 173
enteric neurons, neurotransmitters, ATP, apamin; gastrointestinal tract, guinea-pig, 79

feedback inhibition, tyrosine hydroxylase, dopamine; pheochromocytoma cells, rats, 346
fenoldopam, dopamine receptors, vasopressin; neurohypophysis, rats, 332
flunarizine, calcium, neurotensin, dopamine; striatum, rats, 267
fluperlapine, anticholinergic effect, antischizophrenic effect, antidepressant effect; rodent, bovine and crustacean preparations, 357

GABA, catecholamines, potassium; adrenal glands, dog, 66
GABA, noradrenergic system; locus coeruleus, rats, 380
GABAergic function, lithium; brain, rats, 169
gastric emptying, defaecation, capsaicin, gastrointestinal propulsion; rats, 62
gastrointestinal propulsion, gastric emptying, defaecation, capsaicin; rats, 62
gomphoside, structure-activity relationship, cardiac glycosides; heart, guinea-pig, 98
guanabenz, clonidine, alpha-autoadrenoceptors; blood pressure, rats, 332
guanine nucleotide, inotropic effect, potassium conductance, pertussis toxin; heart, guinea-pig, 403

hemicholinium-3 analog, DMAE, neuromuscular junction; pectoralis muscle, frog, 230
himbacine, muscarine receptors; heart, smooth muscle, guinea-pig, rats, 16
histaminergic neurons, thermoregulation, phencyclidine, methamphetamine; body temperature, mice, 293
5-HT autoreceptors, 5-HT subtypes; brain, pig, rats, 1
5-HT receptors; kidney, rats, 8
5-HT subtypes, 5-HT autoreceptors; brain, pig, rats, 1
5-hydroxytryptamine receptors, noradrenaline; human saphenous vein, 317

ICI 118,551, bisoprolol, procaterol, beta-adrenoceptors, inotropic effect; human right atrium, 142
idazoxan, alpha 2-adrenoceptors; tail arteries, rats, 43
imipramine, L-threo-DOPS, noradrenergic neurons; reserpine-induced ptosis, mice, 243
inotropic effect, antiarrhythmic drugs, sodium channel blockade, tetrodotoxin; papillary muscle, guinea-pig, 184
inotropic effect, ICI 118,551, bisoprolol, procaterol, beta-adrenoceptors; human right atrium, 142
inotropic effect, potassium conductance, pertussis toxin, guanine nucleotide; heart, guinea-pig, 403
insuline secretion, proglumide; pancreatic islets, rats, 284
isotope effects, catecholamines, neuronal-extraneuronal deamination; rats, rabbits, 34

leucocytes, counter irridation, anti-inflammatory effect; oedema, rats, 196
linoleic acid, sodium pump, ATPase, arachidonic acid; human colonic homogenates, 332
lithium, GABAergic function; brain, rats, 169

MAO-B-nociception, enkephalinase inhibition; rats, 376
memantine, anticonvulsant action; convulsions, mice, 93
methamphetamine, histaminergic neurons, thermoregulation, phencyclidine; body temperature, mice, 293
methylene ATP, noradrenaline, blood pressure; tail artery, rats, 384
micturition reflex, capsaicin; urinary bladder, rats, 276
morphine, analgesia, serotonin; analgesia measurements, rats, 208
muscarine receptor, choline, phospholipids, phospholipase D; heart, chicken, 224
muscarine receptors, himbacine; heart smooth muscle, guinea-pig, rats, 16
muscarinic agonists; organs, guinea-pig, 213

neuroleptics, dopamine receptor antagonists, cortisol, SCH 23390, benzazepines; dog, 111
neuromuscular junction, hemicholinium-3 analog, DMAE; pectoralis muscle, frog, 230
neuronal-extraneuronal deamination, isotope effects, catecholamines; rats, rabbits, 34
neuropeptide Y, reserpine, cardiovascular nerves, noradrenaline; heart, guinea-pig, 163
neurotensin, dopamine, flunarizine, calcium; striatum, rats, 267
neurotransmission, opioid receptor types; vas deferens, mice, 57
neurotransmitters, ATP, apamin, enteric neurons; gastrointestinal tract, guinea-pig, 79
noradrenaline, angiotensin-2, vasoconstriction, eicosapentaenoic acid; ear, rabbit, 288
noradrenaline, beta-adrenoceptors, betaxolol; atrial slices, rats, 253
noradrenaline, blood pressure, methylene ATP; tail artery, rats, 384
noradrenaline, blood pressure, opioid peptides, opioid receptors; pithed rabbit, 50
noradrenaline, carrier-mediated transport, sodium; vas deferens, rats, 131
noradrenaline, 3,4-dihydroxyphenylethyleneglycol; brain, rats, 26
noradrenaline, 5-hydroxytryptamine receptors; human saphenous vein, 317
noradrenaline, neuropeptide Y, reserpine, cardiovascular nerves; heart, guinea-pig, 163
noradrenaline, opioid receptor subtypes; atrium, rats, 148
noradrenaline, serotonin, sympathetic nerves, sinus node; vena cava, heart, pithed rats, 124
noradrenergic neurons, imipramine, L-threo-DOPS; reserpine-induced ptosis, mice, 243
noradrenergic system, GABA; locus coeruleus, rats, 380
norepinephrine, alpha-adrenoceptors, clorgyline; vasculature, rats, 236

opioid peptides, opioid receptors, noradrenaline, blood pressure; pithed rabbit, 50
opioid receptor subtypes, noradrenaline; atrium, rats, 148
opioid receptor types, neurotransmission; vas deferens, mice, 57
opioid receptors, acetylcholine; hippocampus, rabbit, 156
opioid receptors, noradrenaline, blood pressure, opioid peptides; pithed rabbit, 50

pertussis toxin, guanine nucleotide, inotropic effect, potassium conductance; heart, guinea-pig, 403
phencyclidine, methamphetamine, histaminergic neurons, thermoregulation; body temperature, mice, 293
phospholipase D, muscarine receptor, choline, phospholipids; heart, chicken, 224
phospholipids, phospholipase D, muscarine receptor, choline; heart, chicken, 224
plasma membrane binding, cytolysis, pseudomonas aeruginosa cytotoxin; Ehrlich ascites cells, 103
platelet aggregation, beta-thromboglobine, thromboxane, AD6; human platelets, 305
potassium conductance, pertussis toxin, guanine nucleotide, inotropic effect; heart, guinea-pig, 403

potassium, GABA, catecholamines; adrenal glands, dog, 66
procaterol, beta-adrenoceptors, inotropic effect, ICI 118,551, bisoprolol; human right atrium, 142
proglumide, insuline secretion; pancreatic islets, rats, 284
prostacyclin, trauma, calcium channel blockers; aorta, rats, 70
pseudomonas aeruginosa cytotoxin, plasma membrane binding, cytolysis; Ehrlich ascites cells, 103
psychoactive drugs, biogenic amines, transmitter systems; brain, rats, 258

radioligand binding, adenosine receptors, cyclopentyladenosine; brain, rats, 179
receptor binding method, dopamine agonists, stereotypy; rats, 338
receptor heterogeneity, receptor subpopulation, binding studies, 313
receptor subpopulation, binding studies, receptor heterogeneity, 313
relaxation, calmodulin antagonists, sodium nitroprusside; smooth muscle, rabbit, guinea-pig, 391
reserpine, cardiovascular nerves, noradrenaline, neuropeptide Y; heart, guinea-pig, 163

saralasin, angiotensin-2, antidiuresis, beta-adrenoceptors; renal function, rats, 271
SCH 23390, benzazepines, neuroleptics, dopamine receptor antagonists, cortisol; dog, 111
serotonin autoreceptors, alpha 2-adrenoceptors; brain cortex, rabbit, 324
serotonin, morphine, analgesia; analgesia measurements, rats, 208
serotonin, sympathetic nerves, sinus node, noradrenaline; vena cava, heart, pithed rats, 124
sinus node, noradrenaline, serotonin, sympathetic nerves; vena cava, heart, pithed rats, 124
sodium, blood pressure, transmitter release; hypertensive rats, 364
sodium channel blockade, tetrodotoxin, inotropic effect, antiarrhythmic drugs; papillary muscle, guinea-pig, 184
sodium nitroprusside, relaxation, calmodulin antagonists; smooth muscle, rabbit, guinea-pig, 391
sodium, noradrenaline, carrier-mediated transport; vas deferens, rats, 131
sodium pump, ATPase, arachidonic acid, linoleic acid; human colonic homogenates, 332
sodium pump, catecholamines; bovine adrenal medulla, 351
sodium, sympathomimetic amines, ATPase; vas deferens, rats, 135
stereotypy, receptor binding method, dopamine agonists; rats, 338
structure-activity relation, beta-adrenoceptor blockers; heart, guinea-pig, 297
structure-activity relationship, cardiac glycosides, gomphoside; heart, guinea-pig, 98
subsensitivity, contractile response, carbachol, temperature dependency; trachea, guinea-pig, 219
sympathetic nerves, sinus node, noradrenaline, serotonin; vena cava, heart, pithed rats, 124
sympathomimetic amines, ATPase, sodium; vas deferens, rats, 135

temperature dependency, subsensitivity, contractile response, carbachol; trachea, guinea-pig, 219
tetrodotoxin, inotropic effect, antiarrhythmic drugs, sodium channel blockade; papillary muscle, guinea-pig, 184
thermoregulation, phencyclidine, methamphetamine, histaminergic neurons; body temperature, mice, 293
thromboxane, AD6, platelet aggregation, beta-thromboglobine; human platelets, 305
transmitter release, sodium, blood pressure; hypertensive rats, 364
transmitter systems, psychoactive drugs, biogenic amines; brain, rats, 258
trauma, calcium channel blockers, prostacyclin; aorta, rats, 70
tyrosine hydroxylase, dopamine, feedback inhibition; pheochromocytoma cells, rats, 346

vasoconstriction, eicosapentaenoic acid, noradrenaline, angiotensin-2; ear, rabbit, 288
vasopressin, fenoldopam, dopamine receptors; neurohypophysis, rats, 332

Contents of volume 332

No. 1 issued on January 22, 1986

G. Engel, M. Göthert, D. Hoyer, E. Schlicker, K. Hillenbrand: Identity of inhibitory presynaptic 5-hydroxytryptamine (5-HT) autoreceptors in the rat brain cortex with 5-HT_{1B} binding sites **1**

K. G. Charlton, R. A. Bond, D. E. Clarke: An inhibitory prejunctional 5-HT_1-like receptor in the isolated perfused rat kidney. Apparent distinction from the 5-HT_{1A}, 5-HT_{1B} and 5-HT_{1C} subtypes **8**

S. Anwar-ul, H. Gilani, L. B. Cobbin: The cardio-selectivity of himbacine: a muscarine receptor antagonist **16**

D. Grigoriadis, P. Seeman: [^{3}H]-Domperidone labels only a single population of receptors which convert from high to low affinity for dopamine in rat brain **21**

P. P. Li, J. J. Warsh, D. D. Godse: Further characterization of brain 3,4-dihydroxyphenylethyleneglycol (DHPG) formation: dependence on noradrenergic activity and site of formation **26**

M. Grohmann, M. Henseling, L. Cassis, U. Trendelenburg: Errors introduced by a tritium label in position 8 of catecholamines **34**

I. C. Medgett, S. Z. Langer: Influence of neuronal uptake on the contribution of smooth muscle α_2-adrenoceptors to vasoconstrictor responses to noradrenaline in SHR and WKY isolated tail arteries **43**

B. Szabo, L. Hedler, H. Ensinger, K. Starke: Opioid peptides decrease noradrenaline release and blood pressure in the rabbit at peripheral receptors **50**

D. Ramme, P. Illes: Differential effect of stimulation strength in mouse vas deferens on inhibition of neuroeffector transmission by receptor type selective opioids **57**

P. Holzer: Capsaicin-sensitive afferent neurones and gastrointestinal propulsion in the rat **62**

S. Kitayama, K. Morita, T. Dohi, A. Tsujimoto: Potassium ion is indispensable to the catecholamine releasing response of dog adrenals to γ-aminobutyric acid **66**

J. Y. Jeremy, D. P. Mikhailidis, P. Dandona: The effect of nifedipine, nimodipine and nisoldipine on agonist- and trauma-stimulated vascular prostacyclin synthesis in vitro **70**

E. Müller-Schweinitzer, C. Tapparelli: Pharmacological studies on frozen stored canine saphenous veins and basilar arteries **74**

M. Costa, J. B. Furness, C. M. S. Humphreys: Apamin distinguishes two types of relaxation mediated by enteric nerves in the guinea-pig gastrointestinal tract **79**

G. M. Rose, H.-R. Olpe, H. L. Haas: Testing of prototype antiepileptics in hippocampal slices **89**

B. S. Meldrum, L. Turski, M. Schwarz, S. J. Czuczwar, K.-H. Sontag: Anticonvulsant action of 1,3-dimethyl-5-aminoadamantane. Pharmacological studies in rodents and baboon, Papio Papio **93**

L. Brown, R. Thomas, T. Watson: Cardiac glycosides with non-rotating steroid to sugar linkages: tools for the study of digitalis structure-activity relationships **98**

F. Lutz: Interaction of *Pseudomonas aeruginosa* cytotoxin with plasma membranes from Ehrlich ascites tumor cells **103**

Short communication

M. Goiny, M. Herrera-Marschitz, K. Uvnäs-Moberg, S. Cekan, U. Ungerstedt: The benzazepine SCH 23390 increases plasma levels of cortisol in the conscious dog **111**

No. 2 issued on February 28, 1986

Rudolf Buchheim Lecture

W. Kobinger: Drugs as tool in research on adrenoceptors **113**

M. Göthert, E. Schlicker, P. Kollecker: Receptor-mediated effects of serotonin and 5-methoxytryptamine on noradrenaline release in the rat vena cava and in the heart of the pithed rat **124**

H. Bönisch, G. Fuchs, K.-H. Graefe: Sodium-dependence of the saturability of carrier-mediated noradrenaline efflux from noradrenergic neurones in the rat vas deferens **131**

H. Bönisch: The role of co-transported sodium in the effect of indirectly acting sympathomimetic amines **135**

H.-R. Zerkowski, K. Ikezono, N. Rohm, J. Chr. Reidemeister, O.-E. Brodde: Human myocardial β-adrenoceptors: demonstration of both β_1- and β_2-adrenoceptors mediating contractile responses to β-agonists on the isolated right atrium **142**

H. Fuder, M. Buder, H.-D. Riers, G. Rothacher: On the opioid receptor subtype inhibiting the evoked release of ^{3}H-noradrenaline from guinea-pig atria in vitro **148**

R. Jackisch, M. Geppert, A. S. Brenner, P. Illes: Presynaptic opioid receptors modulating acetylcholine release in the hippocampus of the rabbit **156**

J. M. Lundberg, A. Al-Saffar, A. Saria, E. Theodorsson-Norheim: Reserpine-induced depletion of neuropeptide Y from cardiovascular nerves and adrenal gland due to enhanced release **163**

M. E. Otero Losada, M. C. Rubio: Acute and chronic effects of lithium chloride on Gaba-ergic function in the rat corpus striatum and frontal cerebral cortex **169**

B. B. Fredholm, B. Jonzon, K. Lindström: Effect of adenosine receptor agonists and other compounds on cyclic AMP accumulation in forskolin-treated hippocampal slices **173**

M. Williams, A. Braunwalder, T. J. Erickson: Evaluation of the binding of the A-1 selective adenosine radioligand, cyclopentyladenosine (CPA), to rat brain tissue **179**

P. Honerjäger, E. Loibl, I. Steidl, G. Schönsteiner, K. Ulm: Negative inotropic effects of tetrodotoxin and seven class 1 anti-arrhythmic drugs in relation to sodium channel blockade **184**

J. Damas, G. Remacle-Volon, E. Deflandre: Further studies of the mechanism of counter irritation by turpentine **196**

No. 3 issued on March 27, 1986

Rudolf Buchheim Lecture

U. Trendelenburg: The metabolizing systems involved in the inactivation of catecholamines **201**

S. Romandini, E. Esposito, R. Samanin: Studies on the separate roles of forebrain and spinal serotonin in morphine analgesia **208**

E. Grana, A. Lucchelli, F. Zonta, M. G. Santagostino-Barbone, G. D'Agostino: Comparative studies of the postjunctional activities of some very potent muscarinic agonists **213**

T. Ishii, Y. Shimo: Cooling-induced subsensitivity to carbachol in the tracheal smooth muscle of the guinea-pig **219**

R. Lindmar, K. Löffelholz, J. Sandmann: Characterization of choline efflux from the perfused heart at rest and after muscarine receptor activation **224**

K. A. Alkadhi: Endplate channel actions of a hemicholinium-3 analog, DMAE **230**

J. P. M. Finberg, I. J. Kopin: Chronic clorgyline treatment enhances release of norepinephrine following sympathetic stimulation in the rat **236**

T. Kato, M. Katsuyama, N. Karai, A. Hirose, M. Nakamura, J. Katsube: Reversal of the reserpine-induced ptosis by L-threo-3,4-dihydroxy-phenylserine (L-threo-DOPS), a (−)-norepinephrine precursor, and its potentiation by imipramine or nialamide **243**

Y. Severne, L. Kanarek, G. Vauquelin: Agonist-mediated conformational changes of β-adrenoceptors could occur independent of functional coupling to Ns **247**

P. Petruzzo, S. Arbilla, J. Allen, S. Z. Langer: Electrical stimulation releases ^{3}H-betaxolol from rat atrial slices: Possible role of noradrenergic nerves **253**

H. R. Burki: Binding of psychoactive drugs to rat brain amine receptors, measured ex vivo, and their effects on the metabolism of biogenic amines **258**

F. Battaini, S. Govoni, S. Di Giovine, M. Trabucchi: Neurotensin effect on dopamine release and calcium transport in rat striatum: interactions with diphenylalkylamine calcium antagonists **267**

J. Greven, J. Pantel: Failure of an angiotensin II antagonist to influence isoprenaline-induced antidiuresis in rats **271**

C. A. Maggi, P. Santicioli, F. Borsini, S. Giuliani, A. Meli: The role of the capsaicin-sensitive innervation of the rat urinary bladder in the activation of micturition reflex **276**

E. J. Verspohl, G. Wunderle, H. P. T. Ammon, J. A. Williams, I. D. Goldfine: Proglumide (gastrin and cholecystokinin receptor antagonist) inhibits insulin secretion in vitro **284**

H. Juan, W. Sametz: Vasoconstriction induced by noradrenaline and angiotensin II is antagonized by eicosapentaenoic acid independent of formation of trienoic eicosanoids **288**

Y. Itoh, R. Oishi, M. Nishibori, K. Saeki: Comparison of effects of phencyclidine and methamphetamine on body temperature in mice: a possible role for histamine neurons in thermoregulation **293**

M. Ichiyama, S. Sada, Y. Takahashi, H. Sada, T. Ban: Effects of bucumolol, nadolol and nifenalol on maximum upstroke velocity of action potential in guinea pig papillary muscles **297**

M. Prosdocimi, A. Zatta, A. Gorio, A. Zanetti, E. Dejana: Action of AD_6 (8-monochloro-3-beta-diethylaminoethyl-4-methyl-7-ethoxycarbonylmethoxy coumarin) on human platelets in vitro **305**

Errata **311**

No. 4 issued on April 30, 1986

S. Hynie, V. Klenerová, Š. Bojar, M. Wenke: Graphical orientation procedure for the estimation of K_d and B_{max} values of ligand binding to two receptor subpopulations **313**

M. Göthert, P. Kollecker, N. Rohm, H.-R. Zerkowski: Inhibitory presynaptic 5-hydroxy-tryptamine (5-HT) receptors on the sympathetic nerves of the human saphenous vein **317**

N. Limberger, G. Bonanno, L. Späth, K. Starke: Autoreceptors and α_2-adrenoceptors at the serotonergic axons of rabbit brain cortex **324**

K. Racké, J. Meuresch, B. Trapp, E. Muscholl: Modulation by fenoldopam (SKF 82526) and bromocriptine of the electrically evoked release of vasopressin from the rat neurohypophysis – Effects of dopamine depletion **332**

H. Rollema, M. G. P. Feenstra, C. J. Grol, M. H. Lewis, L. Staples, R. B. Mailman: S(−)DP-5,6-ADTN as an in vivo dopamine receptor ligand: Relation between displacement by dopamine agonists and their pharmacological effects **338**

G. Laschinski, B. Kittner, M. Bräutigam: Direct inhibition of tyrosine hydroxylase from PC-12 cells by catechol derivatives **346**

A. Wada, H. Takara, N. Yanagihara, H. Kobayashi, F. Izumi: Inhibition of Na^+-pump enhances carbachol-induced influx of $^{45}Ca^{2+}$ and secretion of catecholamines by elevation of cellular accumulation of $^{22}Na^+$ in cultured bovine adrenal medullary cells **351**

C. Rüdeberg, S. Urwyler, C. Schulthess, P. L. Herrling: Biochemical and pharmacological effects of fluperlapine on noradrenaline and acetylcholine systems in some rodent, bovine and crustacean preparations **357**

K. Gradin, C. Dahlöf, B. Persson: A low dietary sodium intake reduces neuronal noradrenaline release and the blood pressure in spontaneously hypertensive rats **364**

J. S. Gutkind, M. Kazanietz, M. A. Enero: Cardiovascular effects of alpha-adrenergic drugs: Differences between clonidine and guanabenz **370**

O. E. Ukponmwan, J. Rupreht, M. Dzoljic: An analgesic effect of enkephalinase inhibition is modulated by monoamine oxidase-B and REM sleep deprivations **376**

B. Scatton, A. Serrano: GABA mimetics increase extracellular DOPAC (as measured by in vivo voltammetry) in the rat locus coeruleus **380**

M. Vidal, P. E. Hicks, S. Z. Langer: Differential effects of α-β-methylene ATP on responses to nerve stimulation in SHR and WKY tail arteries **384**

G. Weinheimer, H. Osswald: Inhibition of endothelium-dependent smooth muscle relaxation by calmodulin antagonists **391**

H. Allgayer, L. Brown, W. Kruis, E. Erdmann, G. Paumgartner: Inhibition of human colonic (Na^+ + K^+)-ATPase by arachidonic and linoleic acid **398**

Short communications
